A young man hears a chance phone call telling him that a nuclear war has started and missiles will hit his city in 70 minutes. Harry finally meets the girl of his dreams--on the last day of Earth. Harry mistakenly picked up a ringing pay phone to learn that a nuclear war had already begun. Now with a ticking clock and a rioting city deteriorating around him, Harry must guide Julie to safety. But can he save himself as lawlessness becomes the norm and terror grips every living soul in the city? How on God's green Earth did anyone rate this movie higher than a 1? I actually watched it to the end just to see how much worse it could get. I mean, c'mon - there wasn't a single credible scene or situation in this entire movie! People just don't behave that way. The dialog was poor, the characters were a joke, the plot didn't exist, it amazes me that someone actually put up the \$\$ to get this film made! And how could Anthony Edwards have gotten suckered into such a dud - this was after Top gun - he must have owed someone a ~big~ favor! This is right up there as one of the worst movies I have ever seen - at least movies like They Live made an attempt to be original. Miracle Mile is worse even than the lame Romeo and Juliette with Leonardo DiCaprio (the only movie I have ever walked out of the theater during). ...at least for this wizened ol' film buff, "Miracle Mile" seems to be woefully underseen by IMDbers, which is a shame. It's littered with known (and much lesser-known) character actors like John "I married Shirley Temple!" Agar, Denise "I was Tasha Yar!" Crosby, Mykelti "Let's go shrimpin' with Forrest!" Williamson, O-Lan "I married Sam Shepard" Jones, Robert "I've been on so many TV shows you'd be amazed!" DoQui, Brian "The Terminator took my clothes!" Thompson, Earl "I was Sarah Conner's shrink!" Boen, and others whose identities I'll leave to the investigations of the determined reader. The film's stars, Anthony "ER" Edwards and Mare "Georgia" Winningham, embody a welcome change from the typical Hollywood "beautiful people" leads, and share a great chemistry portraying tentative new lovers who ultimately share a decidedly unusual courtship. "Miracle Mile" is worth seeing for these people alone, awesome Tangerine Dream score notwithstanding.

No matter. Writer/director Steve De Jarnatt never did much else of similar note, but as far as I'm concerned his reputation is cemented by this wonderfully dark romance. Released shortly before the fall of the Berlin Wall and the collapse of the U.S.S.R., it's Armageddon time shortly after Harry meets Julie, and what fun it is to watch Romeo battle his way to the side of his Juliet. Who can help but smile at the clunkiness of what passed for "mobile" phones back then, or miss the blatant symbolism of authority figures immolating themselves with a careless squeeze of the trigger? "Miracle Mile" is b-movie wonderfulness, and practically screams for a big-budget remake (and if there is, I hope to high heaven that De Jarnatt gets to write it); it's essential viewing for all end-of-the-world movie fans, and far more entertaining than the likes of the recent remake of "The Day the Earth Stood Still." The 2003 DVD release is sadly a retread of the much earlier full-screen laserdisc release, but still very watchable. In fact, it's not to be missed. d6a2afd33b
